SEDES – Simpósio para Estudantes de Doutoramento em Engenharia de Software –
is a doctoral consortium where software engineering students can present and discuss
their thesis work with faculty and peers and network with other researchers in the field.
The first edition of SEDES was part of Congresso Português de Engenharia de
Software, held in Coimbra, in 2004. Since then, SEDES has been looking for a new
"home", and has been welcomed by QUATIC, International Conference on the Quality
of Information and Communications Technology.

In this second edition we strove to reinforce the high standards of the previous
workshop: renowned researchers have been invited for the Program Committee; a
double blind review process was used to evaluate the submissions based on quality,
maturity and clarity of the research problem and research methodology; and generous
time slots have been allocated to enable deeper debates and feedback.

I hope that students find the workshop as worthwhile as those involved in the first
edition did, and that meaningful contributions for their thesis may emerge.

Since organizing such an event is a team effort, I would like to conclude this message
by thanking the valuable contribution of the Members of the Program Committee:
- Ademar Aguiar, Universidade do Porto;
- Antónia Lopes, Universidade de Lisboa;
- António Rito Silva, Instituto Superior Técnico;
- Fernando Brito e Abreu, Universidade Nova de Lisboa;
- João Pascoal de Faria, Universidade do Porto;
- Mário Gaspar da Silva, Universidade de Lisboa;
- Ricardo Jorge Machado, Universidade do Minho.

Paulo Rupino da Cunha
Universidade de Coimbra
SEDES 2007 Chair

		SEDES 2007 @QUATIC - Sept 12, 2007
8H30 - 9H30		Reception. Copy presentations to PC connected to video projector.
9H30 – 9H40		Chair: About SEDES. Agenda for the day
9H40 – 10H00		**Presentation #1 - Disconnected execution in workflow-enabled Web applications** (Edgar Gonçalves)
10H00 - 10H20		Discussion about presentation #1
10H20 - 10H40		**Presentation #2 - Model Driven Development for Pervasive Information Systems** (José Eduardo Fernandes)
10H40 - 11H00		Discussion about presentation #2
11H00 - 11H30		*Coffee Break*
11H30 - 11h50		**Presentation #3 - Automated Information Systems Generation for Process Oriented Organizations** (Francisco Duarte)
11H50 - 12H10		Discussion about presentation #3
12H10 - 12H30		**Presentation #4 - Automatic generation of (form-based) User Interfaces from the system's business logic model** (Antonio Cruz)
12H30 - 12H50		Discussion about presentation #4
13H00 - 14H30		*Lunch*
14H30 - 14H50		**Presentation #5 - Validation of Reactive Software from Scenario-Based Models** (Óscar Ribeiro)
14H50 - 15H10		Discussion about presentation #5
		Sum up
		Organization of next SEDES
		Closing
16H00 - 16H30		*Coffee Break*
